### PROFESSIONAL SUMMARY

---

Dynamic Software Engineer and former Systems Administrator with over a decade of experience bridging the gap between infrastructure stability and scalable application development. Proven track record of designing enterprise .NET and Java solutions, managing complex cloud migrations, and solving high-stakes technical problems across the insurance, power, and healthcare domains.

### SKILLS SUMMARY

---

**Programming/Languages:** C++, C#, Java, JavaScript, HTML, CSS, Python, T-SQL

**Frameworks & Libraries:** .NET, React, Angular, Bootstrap, Web Forms, MVC, Django

**Databases & Tools:** SQL Server, MySQL, Unreal Engine, Unity

**IDEs & DevOps:** Visual Studio, VS Code, Git, Azure, CI/CD pipelines

**Methodologies & Cloud:** Agile/Scrum, Systems Administration, Microsoft 365, Network Security

### WORK EXPERIENCE

---

**Application Engineer** | Great American Insurance Group - Cincinnati, OH Jun 2023 – Jan 2026

- **Full-Stack Development:** Designed, developed, and deployed enterprise-level software applications supporting core insurance processes utilizing Java, .NET, C#, and JavaScript.
- **System Integration:** Collaborated with cross-functional stakeholders to translate complex business logic into seamless technical enhancements, improving application workflow efficiency.
- **Quality Assurance & Maintenance:** Spearheaded root-cause analysis for software defects, rapidly deploying fixes to maintain high application performance and minimize downtime.
- **Agile Collaboration:** Participated in all phases of the SDLC within an Agile/Scrum framework, delivering project milestones on schedule and adapting to evolving scope requirements.

**Software Developer** | Crop Risk Services, American International Group - Decatur, Illinois Feb 2023 – Jun 2023

- **Feature Delivery:** Engineered clean, reliable, and well-tested crop insurance software solutions using C# and .NET, consistently meeting tight regulatory deadlines.
- **Requirement Gathering:** Partnered directly with end-users and business analysts to document technical requirements and map out scalable database architectures in SQL Server.
- **Problem Solving:** Investigated and resolved critical legacy software bugs, utilizing strong diagnostic skills to unblock team development challenges.

**Systems Administrator** | Williams Industrial Services Group, LLC - Tucker, GA

**Jan 2014 – Jan 2022**

- **Infrastructure Leadership:** Directed enterprise-level IT projects managing physical and cloud-based systems across state lines, supporting operations in the electric utilities sector.
- **Security & Compliance:** Architected and managed global Group Policies, Barracuda Web Security, Message Archiver, and spam filtering appliances to enforce strict corporate security postures.
- **Virtualization & Cloud:** Managed daily operations, virtualization, and deployment of enterprise servers and Microsoft 365 environments, ensuring 99.9% uptime for critical business domains.

## EDUCATION & TRAINING

---

**Certification in Game Development** | The Tech Academy

**Jan 2022 – July 2022**

- **Immersive Full-Stack Software Developer Bootcamp** | The Tech Academy (*600+ hours of hands-on coding spanning Computer Science fundamentals, Game Dev, and Web Applications*)
- **Certifications:** Google AI Essentials Certification
